## I declare that

- ----I have accepted the service conditions in order to present the clinical case in which I am interested to Dr. Palminteri, during an online consultation;
- -----I consent to the fact that during the videoconference Dr. Palminteri must receive information on the first elements regarding personal data, as well as symptoms, anamnesis and pathologies in general, with the sole purpose of obtaining an initial overview of the case and schedule the successive clinical examinations and treatment, according to the doctor's working schedule;
- ----I am informed and aware that the videoconference during which I will explain my case to Dr. Palminteri is not a medical examination, does not have therapeutic purposes and no medical prescription will be received, except for the necessity (and/or possibility) of immediately managing the pathology, by means of the indications and medicines suitable for the case;
- ----I am informed and aware that the final diagnosis (and any potential treatment or indications for treatment) will exclusively take place after a live medical examination that Dr. Palminteri will perform, during which both doctor and patient will be present;
- ----I am aware of consenting to have a first contact with Dr. Palminteri, as a consultant to whom I have been referred to or I myself have chosen, via Internet with the sole purpose of saving time and resources, taking into consideration the fact that according to the information I provide Dr. Palminteri, can:
  - -give the first indications on potential diagnostic examinations to have, prior to the day hospital medical visit or hospitalization
  - -optimize the modalities and scheduling of the referral medical examinations, thus avoiding useless and time-consuming trips
  - -refer the patient to Colleague consultants of various medical areas, should this be necessary or convenient, or to other Urologist consultants that possess technical expertise acquired in specific urology fields
  - -optimize the place and time of a potential hospitalization, should the schedulling of the probability or necessity of the above-mentioned be possible right after the first contact

I declare to be informed and aware of all the above-mentioned facts and, without any hesitation or doubt,

## I authorize

Dr. Palminteri to obtain via network (during videoconference) all the necessary information regarding the clinical case for which I have asked his intervention as a surgeon.

I also consent to the processing of data and, if available, photos, with the purpose of clinical research, on the condition that the surgeon commits himself to using the above-mentioned research for scientific purposes only and guaranteeing the anonymity.
